

Name of the Center: Centre for Research

“Aiming to achieve global excellence by establishing an enabling environment that encourages research, upholds academic integrity, and drives societal progress.”

In the contemporary knowledge economy, research and innovation are highly valued. Higher education institutions bear the responsibility of paving the way for a country's future development and progress, even as they play a vital role in shaping future-ready, empowered youth. It is impossible to undervalue the indispensable role that research plays in higher education institutions' efforts to unleash the boundless possibilities of innovation.

The Centre for Research at Christ College of Science and Management enhances academia through its multifaceted focus on innovation and research that supports the academic pursuits.

The Research Advisory Committee acts as the institution's executive body, focusing on building necessary infrastructure, cultivating a research-centric culture, encouraging, monitoring, and recognizing research activities. The committee has developed self-sustaining research facilities, and Bangalore North University has approved one research centre. While faculty are supported in applying for external projects, institutional initiatives have been introduced to involve all departments and faculty in research. Initiatives such as providing seed funding, financial support for research growth, and fostering collaborations aim to enhance the research standing. Academic integrity is maintained by strictly following the Code of Ethics in Research.
